

## EXAMPLES OF CORRIDOR CONTEXT AND CONDITIONS

Ramp metering resulting in AM queues backing into ramp intersection

Ramp metering results in long queues for southbound on-ramp in PM

Lane use distribution skewed to lanes leading to I-25

Southbound I-25 to westbound Dry Creek weaving traffic

Unprotected pedestrian crossings of off-ramps from I-25

Increasing pedestrian activity along and across Dry Creek

Detached sidewalks along new development east of I-25

Existing pedestrian infrastructure investments already made in area, such as this pedestrian overpass extension over Inverness Drive West

Corridor aesthetics/image unique to segment just east of I-25 through Inverness
