

**Income and Poverty by District**

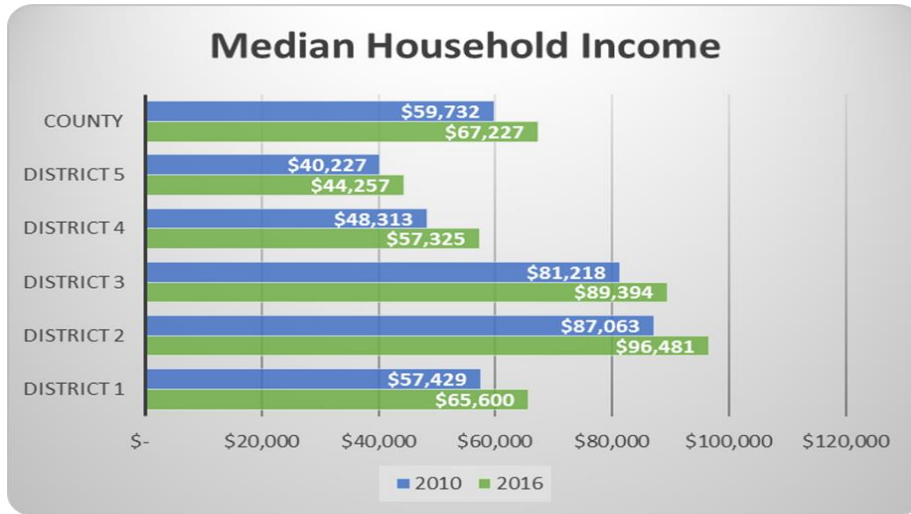

**Income**

The Census Bureau asks households to report their income for the previous 12 months. The table below shows the households by income range for the 2016 American Community Survey. The highlights show the District with the most households in each income range. For example, District 5 has the highest number of households in the four income ranges below \$35,000 per year. District 4 has the most middle income households (\$35,000 to \$99,999). District 2 has the most households with incomes \$100,000 and over.

	Total	Less than \$10,000	\$10,000 to \$14,999	\$15,000 to \$24,999	\$25,000 to \$34,999	\$35,000 to \$49,999	\$50,000 to \$74,999	\$75,000 to \$99,999	\$100,000 to \$149,999	\$150,000 to \$199,999	\$200,000 or more
District 1	50579	2703	2060	3850	4468	6191	9644	5939	7816	3568	4339
District 2	46428	1303	501	2103	2350	3929	7472	6442	10478	4809	7017
District 3	41853	861	761	1468	2280	4142	7408	6958	10044	4553	3377
District 4	49117	2732	1499	3866	5569	7617	11175	7419	6011	1783	1444
District 5	43504	3477	2125	5645	6041	7528	9045	4526	4127	929	430
County	231844	11096	6947	16932	20707	29408	44743	31285	38476	15643	16607

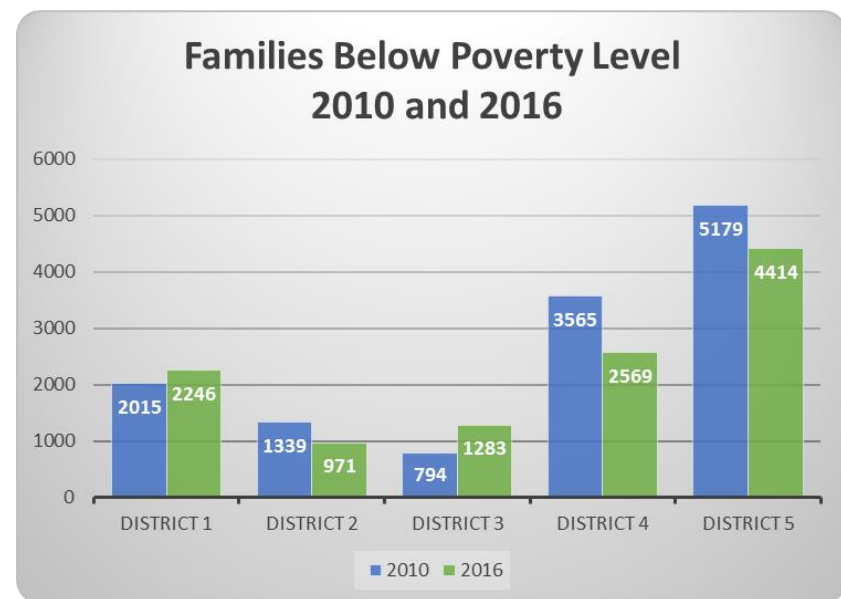

## Arapahoe County Colorado Demographics

The chart provides the change in median household income between 2010 and 2016 by District. The median incomes have gone up in every District. District 2 edged out District 4 by showing the most improvement (an increase of \$9,400 compared to \$9,000 for District 4).

## Poverty

The Census uses the national definition of poverty that is based on income and family size. For example, in 2016 the threshold for a 4 person family was \$24,563. The first chart compares the 2010 and 2016 numbers of all families that were in poverty for each District. Only Districts 1 and 3 showed an increase with District 3 increasing 60 percent. The drops in the other 3 Districts ranged from 360 in District 2 to almost 1,000 in District 4.

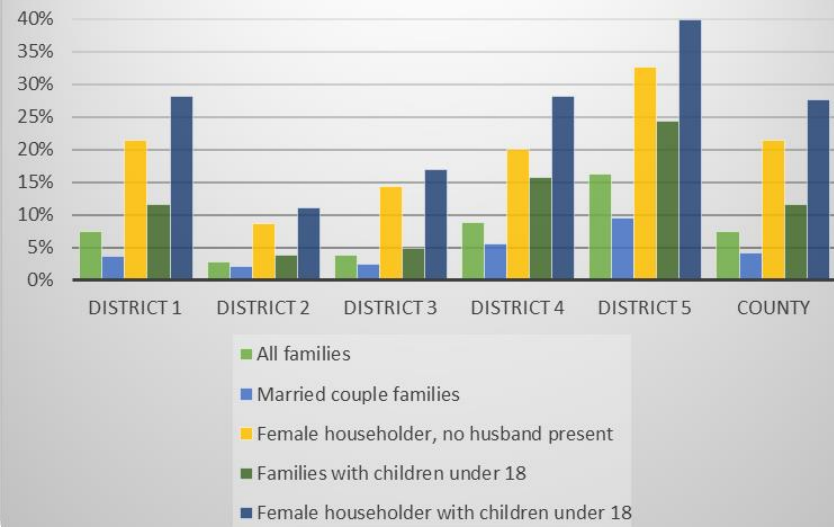

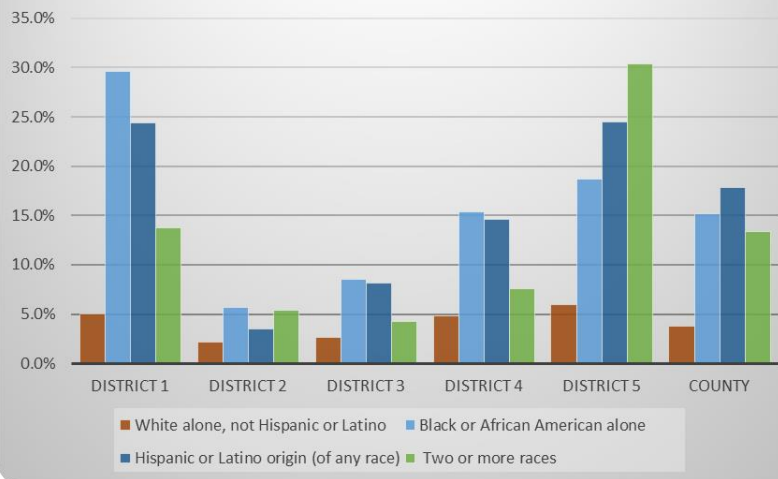

## Arapahoe County Colorado Demographics

The next two charts break out the 2016 data for different family characteristics. The family type chart illustrates the difficulties female headed households face. All female headed households have much higher poverty rates than married couple families. If the household has children under 18, the rate is even higher – 40 percent in District 5 and even 11 percent in District 2, which had the lowest poverty rates.

### Poverty Rate by Family Type, 2016

### Family Poverty Rates by Race and Hispanic Origin, 2016

The last chart is based on the race and Hispanic origin of the householder. The chart does not show the rates for some racial groups (such as Native Hawaiians) that have very small numbers in Arapahoe County. Less than 10 percent of families with a non-Hispanic White householder were in poverty in 2016 and the rate was as low as 2.1 percent in District 2. The rate for persons who reported 2 or more races was highest in District 5 at 30.4 percent. The Black or African-American rate in District 1 was the highest at 29.6 percent. However, District 1 only had 426 families with a Black or African-American householder so the sample error is larger. The poverty rates for Hispanic families vary substantially from a low of 3.5 percent in District 2 to a high of 25 percent in Districts 1 and 5.
